# Model 311

## Features

The "Mighty Mover" is a portable, non-submersible utility pump designed for use in residential or light commercial dewatering applications and can be used to transfer unwanted water away from waterbeds, washing machines and water heaters or to add antifreeze to radiant heating lines. Each pump is built using non-corrodible materials, ensuring a long service life. Because they are both durable and lightweight, these pumps can be transported from one location or project to another very easily. The pump is self priming at 7 feet (2.1 meters) or less above the liquid source and can be used to lift water from 15 feet (5 meters) below the pump's location. With garden hose connections for the inlet and outlet, setup is simple. Each pump comes with an extra impeller, a gasket and one 6' (2 m) hose with a strainer.

## Specifications

### Motor Characteristics

Voltage	115 V
Phase	1 Ph
Hertz	60 Hz
Amps	1.7 Amps

### Pump Characteristics

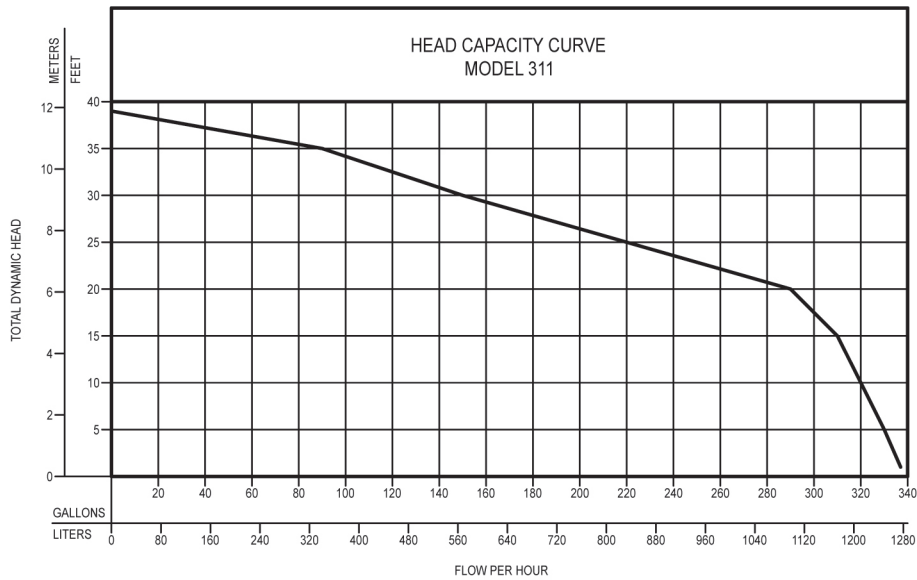

Operation	Nonautomatic
Discharge Size	Garden hose
Cord Length	6' (2 m) standard
Cord Type	Grounded plug
Max Head	39' (11.9 m)
Max Flow Rate	337 GPH (1275.7 LPH)
Max Operating Temp	130° F (54° C) water, 104° F (40° C) air
Cooling	Air
