

SUMPMASTER

BATTERY BACK-UP SYSTEM

The Ultimate Fully-Automatic 115V
Auxiliary Power Source
For Residential
Flood Control

Patent No. 5,508,905

UL LISTED

UL CANADA

- ⚡ Easy Installation, no modifications or piping changes
- ⚡ Works with any 115V sump pump up to 3/4 H.P.
- ⚡ Powers your existing sump pump in an outage
- ⚡ Microprocessor based system design
- ⚡ Fully automatic charging system
- ⚡ Made in the U.S.A.

Quality Construction Features

A battery back-up that won't leave you in the dark!

SumpMaster is the ultimate, fully-automatic, auxiliary power source that money can buy. SumpMaster is a power converter which allows you to do what you have never been able to do before. The SumpMaster actually takes D.C. battery power and converts it into 115 VAC power (when standard power fails or is not available). This allows you to eliminate those unreliable 12 VDC powered pumps and continue to use your standard 115 VAC pump without any modifications or piping changes.

Hinged door for easy battery access

Two deep cycle marine batteries

Quality 16 gauge steel enclosure

Two piece construction for ease of installation

Inverter light lets you know when the power is out or the power quality is poor

Power+ Battery

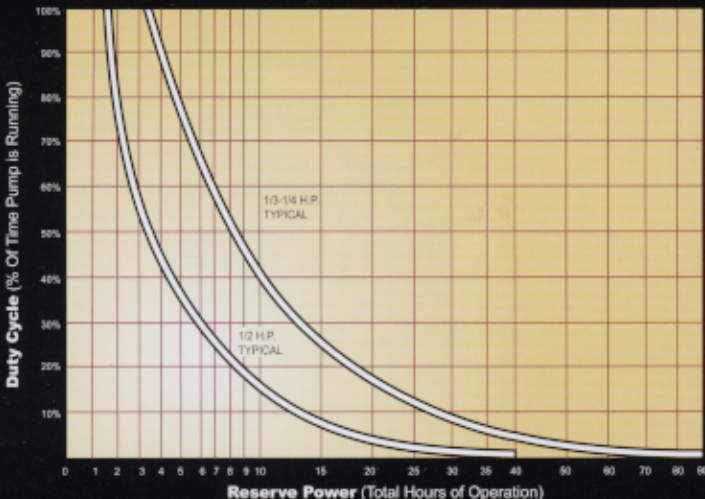

For optimal performance, install Metropolitan Industries' maintenance-free AGM Power+ batteries (not included).

NOTE: By adding extra batteries, you can double or triple the run time!

EXTENDED TWO-YEAR WARRANTY WHEN PURCHASED WITH POWER+ AGM BATTERIES.

Baked-on epoxy finish inside and out to prevent corrosion

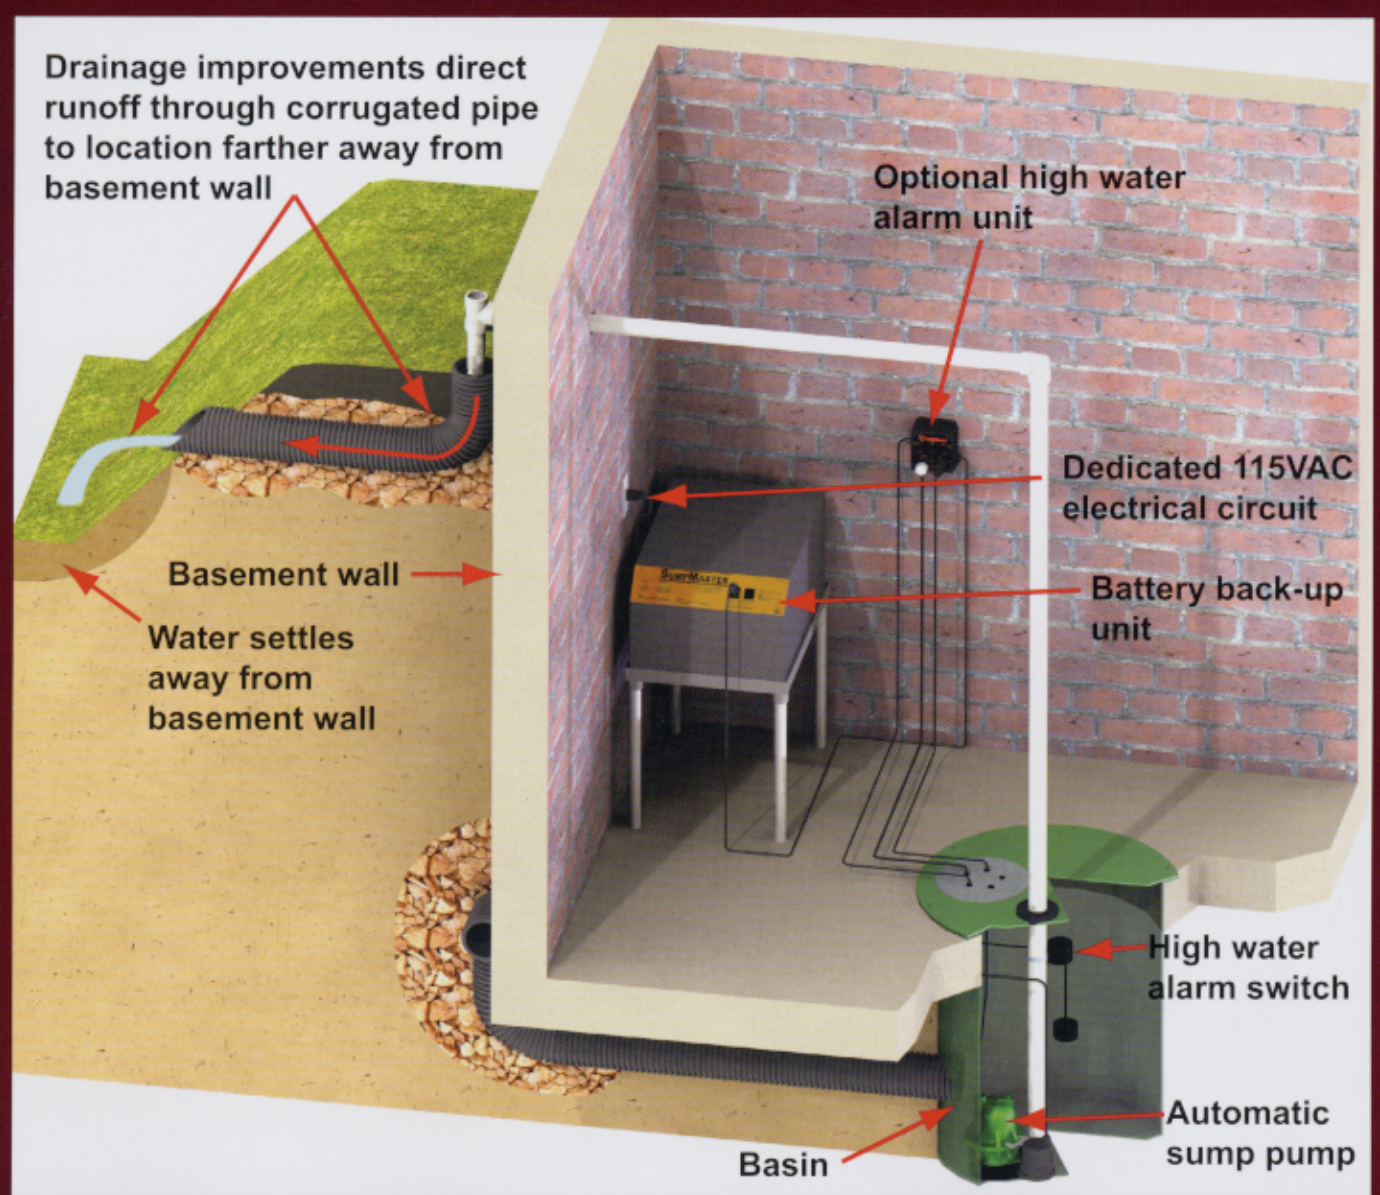

Charge light tells you the status of your batteries

Performance data based on two 120 Amp hour U.L. Recognized Lead Acid Type batteries used in conjunction with pumps of the published horsepower ratings. All equipment in optimum condition. Endurance may vary depending on the products used.

SUMPMASTER

Installs in minutes - plug SumpMaster into wall outlet - plug sump pump into SumpMaster - that's all there is to it...
